Summary

Informatics undergraduate (GPA 3.91/4.00) with hands-on, full-cycle experience building web and mobile applications — from database design and REST API development to frontend/backend implementation and QA testing. Delivered production systems including a room-booking platform with 1,163+ bookings in active use. Seeking a backend/application development internship where I can contribute to web and mobile product development using Flutter, Laravel, and Node.js.

Education

Universitas Sultan Ageng Tirtayasa, Faculty of Engineering *2023 – Present*
Bachelor of Informatics (S1) | Current GPA: 3.91/4.00 | Cilegon, Banten

Experience

PT Krakatau Information Technology — Kerja Praktik, Digital Transformation Division *May 2026*

- Developed features for the TMS v.2 application using the Flutter framework, including the Articles/News module.
- Implemented internationalization (i18n) support across the application.
- Conducted QA testing on new features prior to release.

Freelance — Web & Mobile Developer *2025 – Present*

- Designed and built full-cycle web/mobile applications for 3–5 SME clients using Laravel, Livewire, and MySQL, covering database design, development, and deployment.

Projects

Employee Attendance System — PT XYZ (Laravel, Livewire, MySQL, Flutter) *2026*

- Developed a Flutter mobile application for employee clock-in/clock-out and attendance tracking.
- Built the backend and admin dashboard with Laravel and Livewire to manage employee attendance and workforce data.

SIPINRUNG — Room Booking System (Laravel, MySQL) *2025*

- Designed the database schema and booking workflow covering room availability, reservation requests, and approval status.
- Built the web application end-to-end with Laravel, including an admin dashboard for managing rooms and bookings.
- Deployed the system into production use by Fakultas Teknik UNTIRTA, processing 1,163+ bookings to date.

POS & Business Management Systems (Laravel, Livewire, MySQL) *2025 – Present*

- Delivered production web applications for 3–5 SME clients, including laundry service, hardware store, and wholesale inventory systems.
- Designed database schemas and business logic tailored to each client’s operational workflow.
- Handled the full development cycle independently, from requirements gathering through deployment and support.

Telegram Bot Development (Node.js, Telegram Bot API) *2025 – Present*

- Built freelance Telegram bots for store/catalog management, user administration, and automated sales/order processing.
- Implemented backend logic and third-party API integrations using Node.js and the Telegram Bot API.
- Delivered bots for multiple clients, handling everything from requirements gathering through deployment.

Leadership & Activities

Himpunan Mahasiswa Informatika (HMIF) FT UNTIRTA — Member, Internal Dept. *Feb 2025 – Aug 2026*

Skills & Certifications

Languages: PHP, JavaScript, Python, Java, Dart

Frameworks: Laravel, Flutter, React, Node.js

Databases: MySQL, PostgreSQL

Practices: REST API Design, Database Design, QA/Testing

Tools: Figma, Git

Certifications: Coding Camp 2026 by DBS Foundation, Full-Stack Web Developer (Distinction, Feb–Jul 2026); Dicoding, React & JavaScript Fundamentals; Intermediate Junior Network Administrator, Digitalent (Aug 2025); Database Foundations, Talent Scouting Academy (Feb–Jun 2024)
